## SUMMARY

I am a dynamic and ever seeking to improve and learning individual, currently developing and improving on the software space and intending to transition properly but currently a teaching mechanical instructor. successfully garnered some level of experience in front end technologies, backend technology: markup languages, tailwindcss, stylesheet, mongodb, express, nest js, postgresSQL and growing these experiences.

## EXPERIENCE

### Frontend Team collaborator

#### Volunteer

📅 12/2024 📍 Lagos, Nigeria

##### Company Description

- successfully addition and creation of web interfaces to code base
- project breakdown and timeline for milestone achievement
- project still in development

### Back End Developer(intern)

#### Storipod

📅 05/2024 - Present 📍 Lagos, Nigeria

Understanding typeORM, nest js, object relational mapper

- Learning of algorithms and data structure, database design and entity relationships
- Utilization of understood concept of solid principle, dependency injection and design patterns.
- Use of server side programming (node)
- Interfacing with database( Postgres Sql)
- Querying database, typeORM migrations

### Frontend Web Developer(trainee)

#### Self learnt (udemy)

📅 08/2023 - Present 📍 Lagos, Nigeria

##### Company Description

- Learning and understanding fundamentals stacks of web development
- Utilization of user design and interface practices.
- Translating figma design and innovating on solution with UI
- Creating, interpreting, translating wireframes to actual web pages
- Front end framework adoption: SASS, tailwind css, react js.
- Consumption of API's (restful api's)
- Web page responsiveness

### MECHANICAL INSTRUCTOR(fundamentals of engine)

#### Institute for Industrial Technology Lagos

📅 09/2015 - Present 📍 Lagos, Nigeria

##### Company Description

- Highlight your accomplishments, using numbers if possible.

### GENSET TRAINEE CUMMINS WEST AFRICA

#### IIT

📅 09/2019 - 10/2019 📍 Lagos, Nigeria

##### Company Description

- Highlight your accomplishments, using numbers if possible.

## KEY ACHIEVEMENTS

#### Enhanced Efficiency

Increased project efficiency by 30% through optimized database querying using TypeORM.

#### Power IOT Leadership

Led development of Power IOT project, improving device control functionality by 40%.

#### Responsive Design

Successfully designed 10+ responsive web pages using React and Tailwind CSS.

## LANGUAGES

#### English

Advanced

## CERTIFICATION

#### BSc software development (in-view)

international university of applied science(iubh)

#### Javascript completion certificate

Udemy

#### Advanced CSS & SCSS

Udemy

#### Industrial manufacturing/maintenance

Yaba college of technology

#### TECHNICIANS FOR AFRICA

Caterpillar Inc.

#### ENERGY MANAGER FACILITY MANAGER.

Schneider Electric

#### DISTRIBUTED GENERATION

Schneider Electric

## EXPERIENCE

### GENSET TRAINEE CUMMINS WEST AFRICA

IIT

📅 09/2015 - 09/2015 📍 Location

Company Description

- Highlight your accomplishments, using numbers if possible.

## EDUCATION

### Bachelor's degree, Software development

IU International University of Applied Sciences

📅 06/2024

### National Diploma

Yaba College of Technology

📅 10/2019 - 06/2016

### Advanced css

Udemy Alumni

📅 Date period

### Javascript (Advanced mastery)

Udemy Alumni

📅 Date period

### proficiency, electromechanic

Institute for industrial technology

📅 01/2015 - 12/2018

## PROJECTS

### Power IOT

📅 11/2023 - 03/2024 📍 Location

an interface for embedded solution to control devices over the internet ,allows user to turn on and turn off components,this frontend interfaces with a(collaborated) backend developed with python, HTML, CSS, JS, REACT and redux

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

### E-commerce

📅 09/2023 - 12/2023 📍 Location

A project based around the MERN stack to establish the understanding of no SQL database, backend with mongoose and express : incorporate PayPal payment methods,carts etc

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

### mapty

📅 08/2022 - 09/2022 📍 Location

this a webpage project fundamentally to track fitness activities done by user in certain geographical location, incorporate the library leaflet to pinpoint location on map, stacks used: HTML, CSS, JS

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

## SKILLS

PostgreSQL Database Design

NestJS Redux.js js Web Design

Web Development Communication

Tailwind CSS Web Technologies

Model-view-viewmodel (MVVM)

Responsive Web Design HTML

Front-End Development Node.js

React.js JavaScript

Cascading Style Sheets (CSS) HTML5

# PROJECTS

---

## online banking solution

 Date period  Location

a JavaScript functionality based app to carry out transactions as credit, debit, loan request and credit, sorting of transaction details,project intents was to show proficiency of js array and functionality

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)
